CS 440 Meeting Minutes

Group: 19   Date: November 22 2023   Time: 12:00 PM   Duration: 55 minutes

Location: Computer Science Lounge

Present, on time: Mitchell Jones, Dua'a Hussein, Dylan Brunelle and Daniel Kim.

Present, not on time: None.

Absent: None.

Synopsis: Group members discussed finalization of the coding project final report and what tests and inspections should be present in the testing/inspections sections of the report. The group also discussed plans for the upcoming development project presentation, as well as the creation of diagrams for use in both the presentation and the development project final report.

Recent Individual Accomplishments:

Dylan: Preparations for class presentation.

Dua'a: Completed rough draft of parts of the Coding report. Currently editing those parts of the coding report to a more polished version. Began writing the Coding Report Summary that will accompany the Coding Report that will be completed as other sections are completed.

Daniel: Playtested the game prior to the coding project demonstration to identify if there were any potential bugs that were overlooked. Prepped what I was going to say during the coding project demo.

Mitchell: Performed a final code inspection of the coding project before the demo presentation. Based on my findings, modified codebase to reduce any potential issues that could occur during the game demo. Went back to certain snapshots of the coding project to capture screenshots and added them to the coding report.

Current Individual Activities:

Dylan: Report on code inspections made, as well as tests performed while finishing the coding project.

Dua'a: Began the rough draft of the missing parts of the Development Report in order to begin the presentation that is needed for Monday.

Daniel: Identifying tests/inspections the group did in regards to any functionality I added to the game, and adding these to the coding project final report.

Mitchell: Thinking of any other potential additions regarding the coding report relating to the testing sections.

Individual Action Items:

Mitchell: Finish adding information to the coding report regarding the testing section, particularly the coding inspections. Assist in any other tweaks that may be done to the document before submission.

Dua'a: Finish a rough draft of the Development report by Friday or Saturday. Begin the presentation in order to have it ready by Monday.

Daniel: Contribute slides to the development project presentation. Work on part III of the development project final report.

Dylan: Work on part 3 of dev report.
